SECTION 1 — What Changed: Old Feature vs New Feature

How the Learn & Earn System Has Changed

GoodMarket Learn & Earn has undergone a major update. Instead of receiving instant G$ rewards after completing a quiz, the new system awards an **Achievement NFT** that can be sold or burned to earn G$ tokens.

BEFORE (Old Feature)

- Complete quiz → receive instant G$ reward from smart contract
- Achievement Card had a "Sell This Card" button
- Card showed "Selling Available on [date]" countdown
- No NFT — only an achievement card was generated
- Rewards were sent directly and immediately to the wallet

NOW (New Feature)

- Complete quiz → receive Achievement Card only
- Mint your Achievement Card as an NFT on Celo blockchain
- NFT can be listed on the marketplace for sale
- NFT can be burned to receive a G$ reward based on quiz score
- Only quizzes taken on or after Feb 11, 2026 are eligible to mint

New Earn & Reward Flow:

Take Quiz → **Achievement Card** → **Mint as NFT** → **Sell or Burn**

SECTION 2 — How to Take a Quiz

Step-by-Step: Taking a Quiz

1. Connect your GoodDollar wallet by clicking "Connect GoodDollar Wallet"
2. Navigate to the Learn & Earn page
3. Click the "Start Quiz" button to begin
4. Answer each question — you have 20 seconds per question
5. After all questions are answered, submit your responses
6. Your Achievement Card will appear with your score and reward options

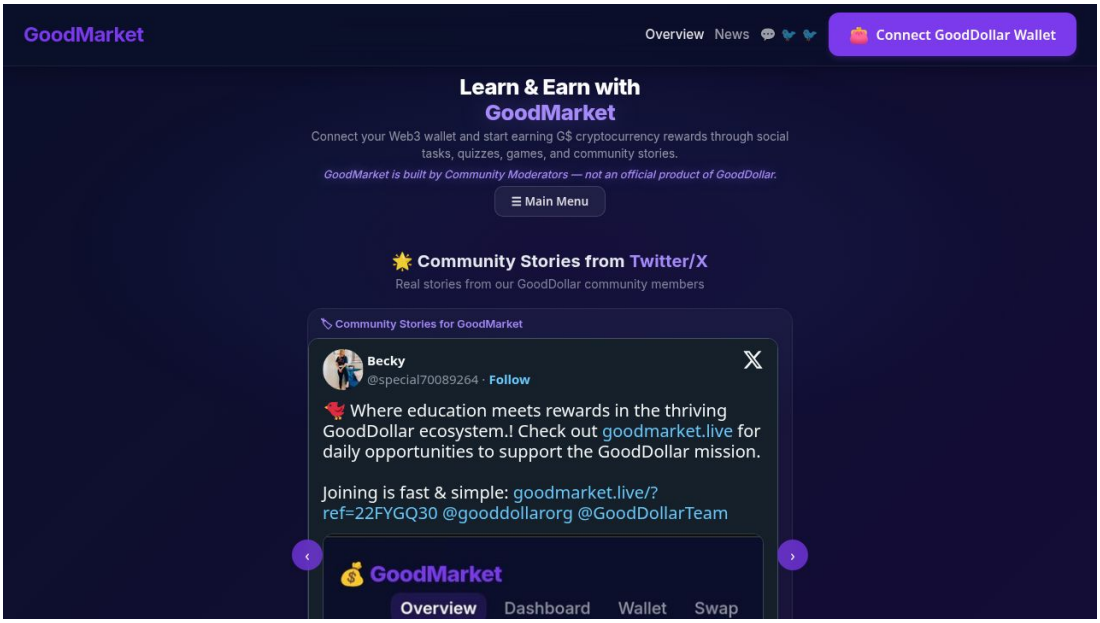

Figure 1: GoodMarket Learn & Earn Main Page — Connect your wallet to start a quiz

Important: You must connect your GoodDollar wallet before starting a quiz. Only one quiz is allowed every 120 hours (5 days) per wallet address.

SECTION 3 — Achievement Card & NFT Minting

Your Achievement Card

After completing a quiz, your **Achievement Card** appears automatically. This card displays your score and provides actions to mint, download, or share your achievement.

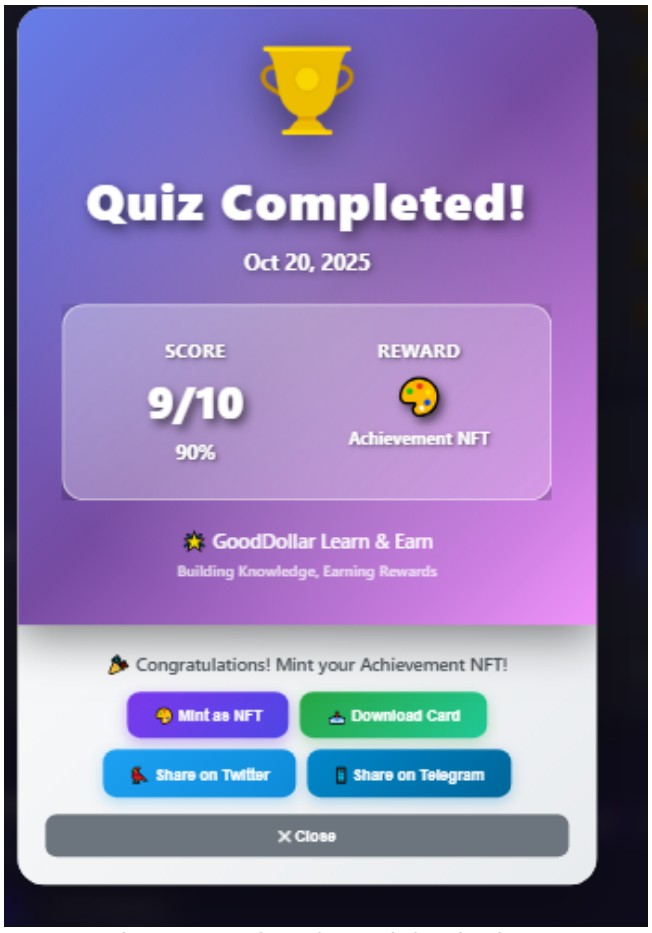

Figure 2: Achievement Card — Appears after quiz completion showing your score and NFT options

What the Achievement Card Contains:

■ **Score**	Your quiz score (e.g. 9/10 — 90%)
■ **Reward**	Achievement NFT — G$ is no longer the direct reward
■ **Date**	The date and time you completed the quiz
■ **Mint as NFT**	Mint your achievement as an NFT on the Celo blockchain
■ **Download Card**	Save your achievement card as an image file
■ **Share**	Share your achievement on Twitter or Telegram

How to Mint Your NFT:

1. After the quiz, click the "■ Mint as NFT" button on your Achievement Card
2. Wait for the minting process to complete — the app pays the gas fee for you
3. Once done, you will see "■ NFT #[number] Minted!" confirmation
4. Your NFT will now appear in the "My NFTs" tab

SECTION 4 — Mint Eligibility Rules

Who Can Mint an NFT?

Not all quizzes are eligible for NFT minting. A cutoff date has been set to protect the integrity of the NFT system and ensure only recent achievements can be minted.

Quiz Date	Eligibility Status	Mint Button Shown
All of 2025	NOT ELIGIBLE	"■ Not Eligible (Before Feb 11, 2026)"
Jan 1 – Feb 10, 2026	NOT ELIGIBLE	"■ Not Eligible (Before Feb 11, 2026)"
Feb 11, 2026 and later	ELIGIBLE	"■ Mint as NFT" — active purple button
Already minted	DONE	"■ Already Minted #[token number]"

Why Is There a Cutoff Date?

The cutoff date of February 11, 2026 was set to prevent mass minting from old achievement cards that were earned before the NFT feature was launched. This ensures marketplace quality and fairness for all users.

Security Layers:

- **Frontend check**: The quiz date is checked instantly on your device — no server call needed for old cards
- **Backend verification**: The server re-verifies the quiz timestamp from the database, even if someone tries to bypass the frontend
- **One quiz = One NFT**: The same quiz cannot be minted twice — duplicate minting is blocked

SECTION 5 — NFT Marketplace: How to Sell

Selling Your NFT in the Marketplace

After minting an NFT, you can list it for sale in the GoodMarket NFT Marketplace. All transactions are recorded on the Celo blockchain.

For the Seller:

1. Go to the Learn & Earn page and click the "My NFTs" tab
2. Find the NFT you want to sell
3. Click the "■■ List for Sale" button on the NFT card
4. A modal will appear showing the suggested price (based on your quiz score)
5. Confirm the listing — your NFT will now appear in the "NFT Marketplace" tab
6. When someone buys it, you will receive G$ tokens in your wallet

For the Buyer:

1. Go to the "■ NFT Marketplace" tab
2. Browse available NFTs — the price in G$ is shown on each card
3. Click the "■ Buy NFT" button on the NFT you want
4. Approve the G$ transfer in your wallet (MetaMask or GoodDollar wallet)
5. Once confirmed, the NFT is transferred to your wallet

Notes:

- The listing price is suggested based on quiz score: (score / total) × 1,000 G$
- You can delist (remove from sale) your NFT at any time before it is purchased
- All sale transactions are recorded in the "■ Tx History" tab

SECTION 6 — How to Burn an NFT

■ NFT Burning — What It Is and How It Works

Burning is the process of permanently destroying an NFT. In GoodMarket, when you burn an NFT, you receive a **G$ token reward** calculated from your original quiz score.

How to Burn an NFT:

1. Go to the "My NFTs" tab on the Learn & Earn page
2. Find the NFT you want to burn
3. Click the "■ Burn NFT" button on the NFT card
4. A confirmation modal appears showing your estimated G$ reward
5. Confirm the burn — the NFT is sent to the dead address (0x000...dEaD)
6. Your G$ reward is sent directly to your wallet
7. The burn is recorded in "■ Tx History" under the "■ Burn History" section

Burn Reward Formula: (score ÷ total questions) × 1,000 G$

Quiz Score	Calculation	Burn Reward
10/10 — 100%	(10/10) × 1,000	1,000 G$
9/10 — 90%	(9/10) × 1,000	900 G$
8/10 — 80%	(8/10) × 1,000	800 G$
7/10 — 70%	(7/10) × 1,000	700 G$
5/10 — 50%	(5/10) × 1,000	500 G$

- **Burning is permanent** — the NFT cannot be recovered after it is burned
- You cannot burn an NFT that is currently listed on the marketplace — delist it first
- The G$ reward is sent directly to your connected wallet address
- Every burn transaction has a verifiable link on CeloScan blockchain explorer

SECTION 7 — Transaction History

■ Viewing Your Transaction History

The "■ Tx History" tab displays all your NFT transactions — both sales and burns — in one place.

Section	Contents	Information Shown
■ NFT Sales	All NFTs you have sold	Token #, Quiz name, Price, Seller, Buyer, TX hash, Date
■ Burn History	All NFTs you have burned	Token #, Quiz, Score, Reward, Wallet, Burn TX, Reward TX, Date

How to View Transaction History:

1. Connect your wallet on the Learn & Earn page
2. Scroll down to the tab section
3. Click the "■ Tx History" tab
4. The page loads two sections: "■ NFT Sales" and "■ Burn History"
5. Click any TX hash link to view the transaction on CeloScan

Every transaction has a link to CeloScan (celoscan.io) — the official Celo blockchain explorer — so you can independently verify the authenticity of every sale and burn.

SECTION 8 — Quick Reference Summary

All Features at a Glance

Feature	How to Use	Result
■ Take Quiz	Start Quiz → Answer questions → Submit	Achievement Card + record saved
■ Mint NFT	Achievement Card → "Mint as NFT" button	NFT minted on Celo (app pays gas)
■■ List for Sale	My NFTs → "List for Sale" → Set price	NFT appears in marketplace
■ Delist	My NFTs → "Remove from Sale"	NFT removed from marketplace
■ Sell	Buyer clicks "Buy NFT" → approves G$ → confirms	G$ to seller, NFT to buyer
■ Burn	My NFTs → "Burn NFT" → Confirm	NFT destroyed, G$ reward received
■ History	"Tx History" tab	All sale and burn records

Key Dates & Numbers

■ **NFT Mint Cutoff**	Quizzes taken before Feb 11, 2026 are NOT eligible for minting
■ **Quiz Cooldown**	120 hours (5 days) between each quiz attempt
■ **Maximum Burn Reward**	1,000 G$ for a perfect score (100%)
■ **Burn Reward Formula**	(score ÷ total questions) × 1,000 G$
■ **Gas Fee**	FREE — GoodMarket app pays gas fees for NFT minting
■ **Blockchain**	Celo Mainnet — fast and low-cost transactions
■ **Block Explorer**	CeloScan (celoscan.io) — verify all transactions
